

## RAPID Series Pad printing machine

- User-friendly 4" touch panel for central control
- Simplified and exact adjustment of printing pad dwell times
- Electromechanical drive
- Integration in automations

Product update

### New ease of use is impressive

The compact RAPID built-in machine series, which is designed for continuous operation, has been upgraded. Thanks to the new features, the user-friendly touch panel and the electronic cam control unit, the machine is now even more convenient to operate.

**RAPID 60 built-in with optional ink residue pick-up system**

The machines of the RAPID series are used for integration in fully automated processes in various industrial sectors, such as automotive, toys, medical technology and many more. They focus on product markings and decorations, which are produced in high quantities and at high process speed.

The machine impresses with its high speed and at the same time with its high repeat accuracy. Thanks to its smooth running, it provides for a stable and continuous printing process. The

**Print area RAPID 90**

user-friendly touch control panel allows the setting of parameters such as speed, printing pad dwell times or multiple printing. The electronic cam control unit ensures accurate setting of the stop and signal points within the machine movement sequence.

The RAPID series is available with useful, practical and additional extensions for individual configurations. The optional ink residue pick-up system is recommended for consistent print quality. For the integration into automation

**State-of-the-art operation via user-friendly touch display**

systems, the options machine cross table (for easier adjustment) and swiveling device (for better accessibility) are available.

The product update of the series now makes them even easier to use.
